STRUXURE®

A History of Innovation

StruXure was named on Inc. 5000 Fastest Growing Private Companies list 2019, 2018, 2017, 2016, and 2015, as well as Entrepreneur 360 Best Company list 2019, 2018, & 2016.

We aren't kidding when we say that StruXure is rooted in innovation. Company founder, CEO, and Chief Product Architect, Scott Selzer was a middle-school teacher with a part-time remodeling business on the side. He specialized in building decks and pergolas, refinishing basements, and tackling other home improvement projects for his clients. When he was asked to find a solution for creating an outdoor shade structure that would still allow sunlight to penetrate the adjacent home's interiors, Scott went on an exhaustive search, eventually concluding that the caliber of product he was seeking didn't exist. Never one to settle, Scott decided to design and build his own product, a pivoting louvered-roof structure that the user could control. Little did Scott know that he had begun a journey that would lead to one of the fastest growing* privately held companies in the United States.

What began as Adjustable Patio Covers, a company focused on improving outdoor spaces, and the first to bring an adjustable louvered system to the East Coast, evolved into Arcadia Building Products, before becoming StruXure Outdoor in December 2018, and StruXure in 2020.

The Pivot model was our first company offering in 2011, a structure designed and engineered to withstand all types of weather conditions. Scott continued to find ways to re-design, innovate, and patent even higher quality products, adding the Slide in 2016 and the Pivot XL in 2018. Steady growth led us to move into a new state-of-the-art manufacturing facility and corporate headquarters just north of Atlanta, GA in 2016. We also expanded operations from our existing Southern California office to a much larger West Coast Fulfillment Center and Showroom, located just outside of Las Vegas, NV, in the fall of 2017. StruXure has future plans to open additional distribution facilities to keep up with our growing national dealer network. With StruXure dealers from Canada to the Caribbean, we are poised and ready to lead the way to more innovative outdoor living across North America and beyond.

We are proud of our roots, which is why StruXure still holds true to our core values: quality, customer service, and innovation. In pursuit of building a great company, we recognize that good isn't good enough. That's why we will never compromise the quality of our products. We also know that to be great we must offer impeccable customer service to our dealers and their customers. StruXure is continually expanding our technology and design, with a focus on architectural innovation and leading-edge building materials. Our next generation of products will continue to evolve and break new ground. As the leader in automated shade and shelter, our mission is to enhance outdoor living and exceed people's expectations for what an outdoor lifestyle really means.

The development of Cabana X is a result of StruXure's relentless commitment to innovation and opportunity.

Cabana X is a fully customizable furniture product that can be assembled in just a few short hours and transported to go wherever life takes you.

Accessible Price

Cabana X provides all of the StruXure shade technology at a lower price point, opening up even more opportunities.

Quick Assembly

The Cabana X can be ordered, delivered, and assembled in a matter of days, making it the perfect shade solution for the spontaneous backyard overhaul.

Custom Options

In this case, one size may fit all but that's not the end of the story. Choose from several different finishes and get yours with or without lights + tech.

Stainless Steel Hardware

Modular Configuration Ready

Enhancement Ready

The Core Model is everything we, at StruXure, envisioned when we dreamed up the Cabana X. It's simple design gives it an edge in the market and provides an affordable and quick shade solution.

Tech Model

Core + Lighting

The Tech Model was designed to push the bounds of what is possible. It takes the simplicity of the Core Model but incorporates the innovation we couldn't help but add.

Enhancements

- ① Corbel Ends
- ② Curtain Rods
- ③ Sunbrella™ Curtains
- ④ Slat Panels
- ⑤ Decorative Panels
- ⑥ Solid Panels
- ⑦ Daybed (Coming Soon)

Best-in -Class

Technology

Weather Sensors

They keep an eye on the weather so you don't have to and adjust the louvers accordingly.

RGB Lights

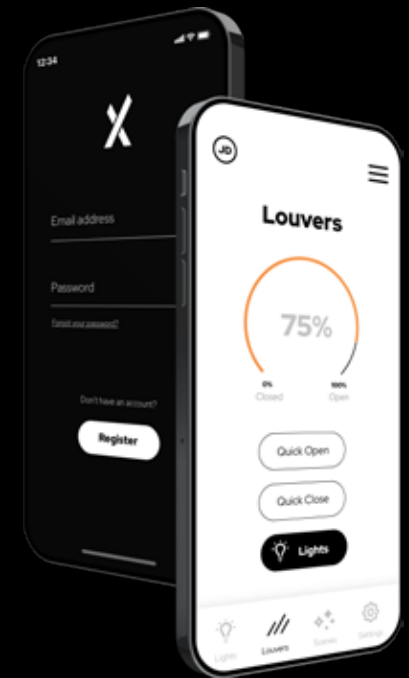

Owners of the Tech Model can enjoy the glow of any color light, creating the right mood for every moment.

Hot Spot Enabled

The Tech Model also allows for the seamless integration of Wi-Fi enabled devices.

Motorized Louvers

StruXure's signature motorized louver technology allows owners to quickly open and close louvers at the touch of a button.

App integration gives maximum control

Owners of the Tech Model will enjoy the ability to control their Cabana X from anywhere, anytime.

Modular Design

Thoughtful innovation looks like reducing unnecessary costs and waste to create more shaded spaces with less.

The modular design was intentionally crafted to allow separate Cabana X structures to connect, establishing more defined spaces at a lower cost and less material.

Commercial

Residential
