

Eaton's EV charging solutions

EV charging for
a modern grid.

EATON

Powering Business Worldwide

Recharge your electric vehicle faster and smarter with the EV charging smart breaker.

Simple App
base control

Speed and control

- Enjoy fast AC charging at 7.7kW, 240Vac with revenue-grade metering accuracy ($\pm 0.2\%$ per ANS C12.20).
- Real-time and remote access allows you to optimize charging times and take part in smart grid programs.

Stay connected and customize

- Stay up to date with our mobile app and begin charging with a tap of your finger.
- Powered by our Brightlayer platform, our open approach through cloud APIs and OCPP enable integration with your preferred charging management solution.

Energy savings and efficiency

- The circuit breaker form factor enables a more efficient and simple installation.
- ENERGY STAR® certification ensures maximum energy efficiency and savings.

Eaton's multiple installation options allow maximum flexibility.

Installs directly in the loadcenter close to where the electric vehicle will be parked.

Installs directly into the loadcenter and includes a junction box for when the electric vehicle is parked further away.

Installs directly into the electric vehicle wallbox for additional versatility and more modern design.

Installs directly in both single or dual port pedestals to make charging more accessible in open parking areas.

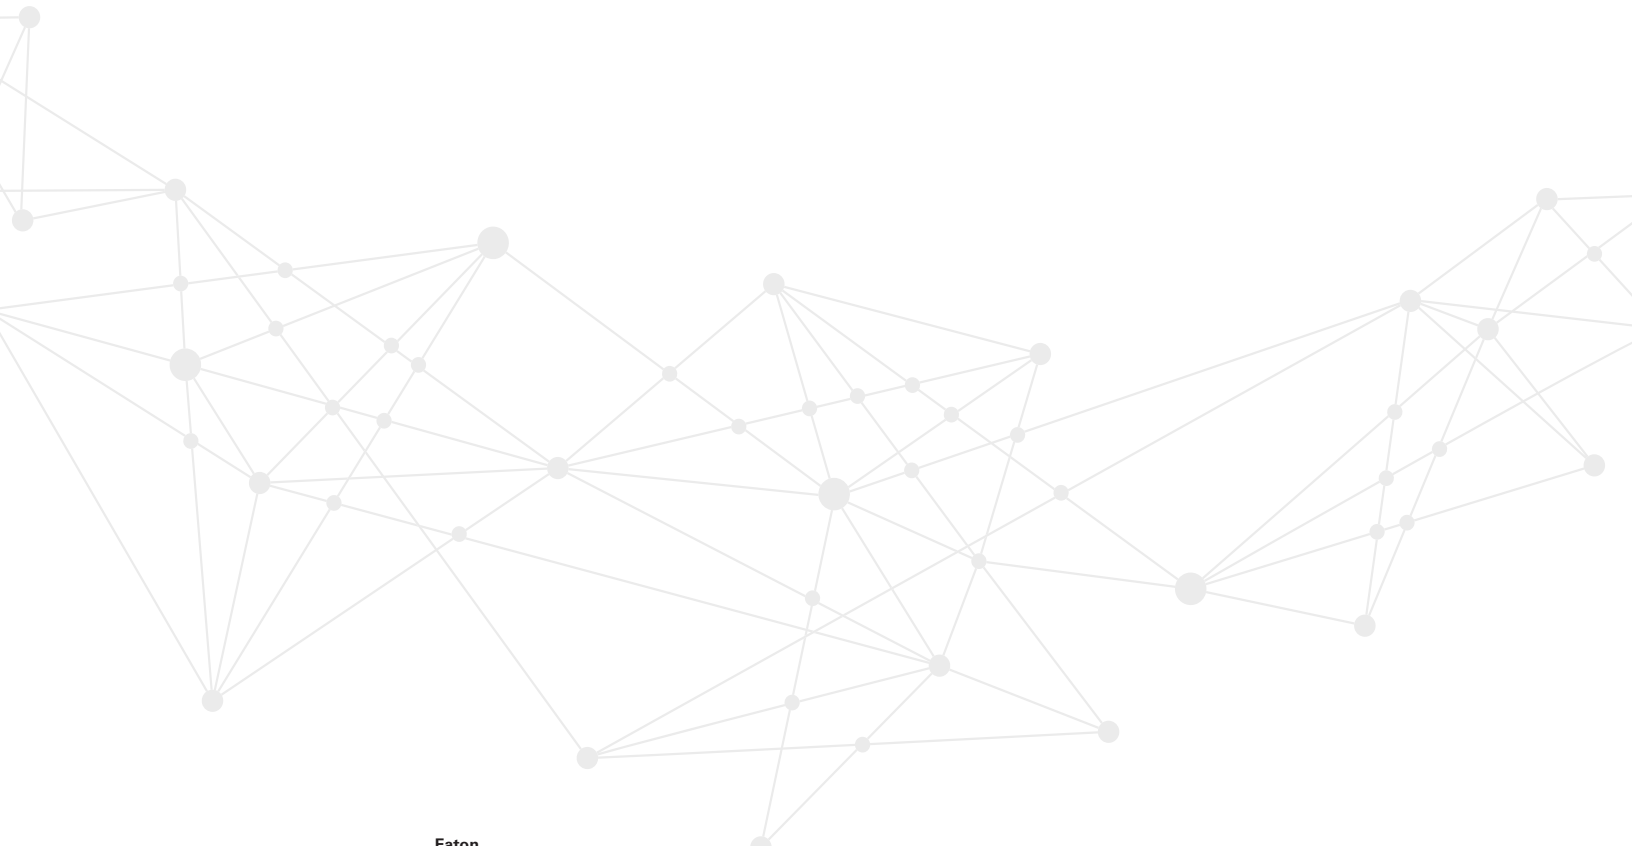

NOTE: The universal J1772™ charging connector is compatible with any EV meeting the SAE J1772™ charging standard. UL listed and tested for electrical safety and features 20mA ground fault protection.

Not sure where to start? See detailed specifications & API documentation at [Eaton.com/ev-charging](https://www.eaton.com/ev-charging).

We make what matters work.*

* At Eaton, we believe that power is a fundamental part of just about everything people do. Technology, transportation, energy and infrastructure—these are things the world relies on every day. That's why Eaton is dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because that's what really matters. And we're here to make sure it works.
