

# GENERATOR ACCESSORIES

For Home and Small Business

**KOHLER**<sup>®</sup>  
IN POWER. SINCE 1920.

# GENERATOR ACCESSORIES

Paired with our durable and reliable standby generators, KOHLER® generator accessories help you communicate with your system remotely, protect in adverse weather conditions, and maintain your generator for peak performance.

## LOOSE ACCESSORIES

### POWERSYNC® AUTOMATIC PARALLELING MODULE (APM)

Sync two smaller generators side by side. PowerSync simultaneously runs one generator when power requirements are low and automatically starts, syncs, and connects the second generator when demand increases. OnCue® Plus generator management system is included with PowerSync for both generator sets.

Requires RDC2 controller, RXT ATS, and load-shed kit (if total load is larger than maximum load).

### POWER RELAY MODULE (PRM)

Add loads and prevent overloading. The PRM lets you manage higher electrical loads on a smaller generator by prioritizing the circuits that cycle on and off (based on load size) to prevent overloading.

Requires RXT or RDT single-phase automatic transfer switch (ATS) with load-shed kit or RXT automatic transfer switch with combined interface/load-management board; ATS single-phase equipped with RDC2 or DC2 controller.

### LOAD-SHED KIT

Protect sophisticated electronics. The load-shed kit monitors current and frequency to automatically disconnect noncritical loads, allowing a smaller generator to power your home. It also prevents frequency dips that may damage electronics. Add an additional four loads with the power relay module.

Larger current transformer is available if needed.

### BATTERY

Rest easy with dependable starting. Power your generator engine with a reliable 12-volt battery. Generators ship without batteries to ensure that the freshest possible battery is installed at the jobsite.

### CONCRETE PAD

Safely install your air-cooled generator. Available in 3- and 4-inch models, the flat bottom of our concrete pad helps your installer easily mount and level the generator and prevent it from sinking into the ground. The 4-inch pad meets 175-mph wind rating for hurricanes and windstorms.

For KOHLER air-cooled generators. Generator shown sold separately.

### PROGRAMMABLE INTERFACE MODULE (PIM)

Remotely control important items at home. Perfect for those who travel frequently or own a vacation home, the PIM lets you activate critical items like storm shutters or a security system when you're away (when partnered with the OnCue Plus generator management system) and alerts you when an input such as a water-level alarm goes off.

### OIL MAKEUP KIT

Extend time between oil checks. Extend the generator engine's runtime between oil-level checks and oil changes with the oil makeup kit. Because it increases the generator set's oil capacity, the generator can go longer between maintenance intervals.

### RUN/Common FAULT RELAY

Enjoy flexibility to add custom options. A run/common fault relay kit lets your installer add optional relays to customer-provided equipment. Provides two optional relays to control equipment: the auxiliary run relay is energized when the generator set is running; the common fault relay is energized on fault to trigger warning devices if a fault occurs.

## COLD-WEATHER HEATER KITS

### BATTERY HEATER KIT

Maintain optimum battery temperatures.

Feel confident that your generator will perform in subfreezing weather. When the temperature falls below a determined level, the thermostat activates the battery heater for optimum battery temperature.

Recommended for regions where the temperature regularly falls below 0°C (32°F).

### BLOCK HEATER KIT

Get extra protection from winter weather.

Make generator starting easier with an engine block heater kit. It heats the coolant in liquid-cooled engines for smoother starts and helps keep engine oil at optimal operating temperatures.

### CARBURETOR HEATER KIT

Prevent moisture buildup in cold-weather conditions.

If you live where temperatures routinely dip below freezing, a carburetor heater prevents moisture buildup in the fuel line to help keep cold-weather conditions from disrupting generator operation.

Recommended for regions where the temperature regularly falls below 0°C (32°F).

### FUEL REGULATOR HEATER KIT

Get reliable starting in subzero temperatures.

Just like in your car, the fuel regulator regulates the flow of engine fuel for consistent pressure. The heater kit ensures that the engine in your KOHLER® generator runs smoothly, even in subzero weather.

Recommended for reliable engine starting in temperatures from -18° to -29°C (0° to -20°F). Requires a continuous source of AC power backed up by the generator set.

### OIL PAN HEATER KIT

Ensure cold-weather starts in freezing temps.

When the temperature falls, the oil pan heater kit activates, creating optimum battery temperature. It helps ensure cold-weather starting and reduces engine wear.

Recommended for regions where the temperature regularly falls below 0°C (32°F).

## REMOTE MONITORING

### ONCUE® PLUS GENERATOR MANAGEMENT SYSTEM

Get peace of mind in the palm of your hand.

Whether you're home or on the go, OnCue Plus lets you monitor your generator system from your mobile device or computer, and get instant updates via text or mail.

Compatible with iPhone®, iPad®, Android™ device, PC or Mac®.

## MAINTENANCE KITS

### MAINTENANCE KIT

Enjoy easy maintenance for peak performance.

Keep your KOHLER generator running at peak performance with genuine KOHLER engine oil and parts. The kit includes everything you need for regular maintenance, from recommended air and oil filters to the correct amount of oil.

## WARRANTY

Every KOHLER standby generator (up to 150 kW) comes with a standard 5-year/2,000-hour limited warranty. For comprehensive coverage, customers can also purchase our extended limited warranty—which covers parts, labor and dealer travel for the duration of the 5-year warranty period. Please Note: The extended warranty is only valid if your KOHLER generator is started up by an authorized KOHLER dealer and the generator is registered with Kohler Co. within 90 days of startup.
